### OCCUPATIONAL HEALTH AND SAFETY FALL 2017 CALENDAR

#### SEPTEMBER

- **30**

#### OCTOBER

- **10** Health and Safety Management and Program Development (3)
- **15** Designing and Delivering Effective Health and Safety Training (5)
- **25** Health and Safety Management and Program Development (3)

#### NOVEMBER

- **15** Environmental and Toxics Laws and Regulations (2)
- **16** Fire and Life Safety Awareness (2)

#### DECEMBER

- **1** Environment and Toxics Laws and Regulations (2)
Learn from the best in the industry! UC Davis Extension offers the region’s premier training in occupational health and safety. Through individual courses, or our certificate or professional concentrations, learn new skills to create and maintain a safer work environment that complies with state and federal laws and regulations. In addition to real-world learning, our courses also represent exceptional networking opportunities. For more in-depth course information, visit our website at extension.ucdavis.edu/safety. If you have any questions, please contact us at extension@ucdavis.edu to discuss.

Health and Safety

Health and Safety Management Program Development
Explore the various approaches to health and safety management, including methods to identify and mitigate top management support, institutionalization, and employee participation. Learn how to develop the real cost of accidents, behavior modification practices, the success and failure of reward and recognition programs and techniques for systems-based auditing. This is a required course for the Workplace Health and Safety Certificate Program. Michael Cooper

Fire and Life Safety Awareness
Design and deliver effective Health and Safety Training
Learn to design, develop and deliver workplace health and safety training programs using a wide range of instructional methods. You will develop and deliver a presentation using the techniques covered and are encouraged to bring workplace projects and supporting materials. A laptop computer is recommended, but not required. This required course for the Health and Safety Training Professional Certification. Patrick Chew

Environmental and Toxics Laws and Regulations
Examine the federal, state and local environmental programs that regulate industrial emissions, water quality and air quality. This course also includes an examination of the crucial role pollution prevention can play to improve business performance. Gary Luckes

Ergonomics in the Workplace
If your employees experience problems with lifting, repetitive motion or overexertion, their improper work practices may cause serious and long-term disabilities. Learn the fundamentals of ergonomics in industrial and office workplaces. A review of safe work practices with a focus on basic ergonomics may help your organization. Develop ergonomic recognition and identification skills necessary for implementation of an overall injury prevention strategy. Discussions and exercises will focus on problem solving in real occupational situations. This is a required course for the Workplace Health and Safety Certificate Program. Susan Tingley

Workplace Health and Safety Manager Certificate Program

Workplace Health and Safety Manager Certificate Program
Expand your knowledge of current health and safety issues and regulations, and learn to create and maintain a safer work environment. Examine the issues confronting business, industry and government; become proactive in managing health and safety programs. Learn about the most current OSHA regulations and methods of compliance, as well as current emergency management techniques. Discover how to integrate employee health and safety into daily decision making, save organizational resources and contribute to enhanced employee performance.

More information on any of our programs or courses, contact us at extension@ucdavis.edu or visit our website.

Why UC Davis Extension?

"After registering for the Health and Safety Workplace Manager Certificate Program and taking just three courses I am already better equipped to manage potential risk, limit liability, and serve the needs of my internal customers. I am making a lasting difference in the lives of my coworkers and I have more confidence in my ability to respond to future employee challenges."

—Rachel Peerman, Occupational Health and Safety student

WHAT PEOPLE ARE SAYING

Custom Training for your Organization

Bring UC Davis Extension courses to your employees. We provide premier training to help you stay up to date on occupational health and safety issues, including OSHA and Cal/OSHA regulations, hazardous materials and workplace violence. Use our certificate exam preparation courses to help your employees get the necessary credits to maintain their professional certifications. For more information on our custom courses, contact us at extension@ucdavis.edu.

Interested in taking the CSP/ASP/OHST Exams?
All academic courses in this brochure are designed to help prepare students for the CSP, ASP and OHST certification examinations. Students enrolled in our certificate program are eligible for the ASSE student discount membership. Visit the ASSE website sacramentosaw.com to learn more.
