Celebrating Our Partners in Continuing and Professional Education

This past September, UC Davis Continuing and Professional Education was honored to gather in recognition of our outstanding instructors, faculty and organizational partners. Their engagement is vital to fulfilling our mission to create access to university-quality learning opportunities that help busy adult learners realize their goals and dreams. Our teachers and partners are at the heart of our work – helping to ensure we understand learner needs, develop relevant educational programs that are tailored to professionals and deliver experiences with the power to transform lives.

We wish to congratulate all those who were honored at the 2018 Outstanding Service Awards for their passion, commitment and excellence. Our appreciation also extends to the many others who engage with us in this work. We are deeply grateful for your partnership in extending UC Davis to the community for broader impact. You are forever part of the Continuing and Professional Education family.

2018 Outstanding Service Award Recipients:

- Peggi Cooney (Center for Human Services)
- Steve Crouch (Labor Management Relations)
- Donald Frazer (Winemaking)
- Beverly Kyer (Center for Human Services)
- Brent Martin (Web Development)
- Paul Martin (Construction Management)
- Christian Miller (Winemaking)
- Brian Paciotti (Healthcare Analytics)
- Paul Porter (Management and Leadership)
- Antero “Terry” Rivasplata (Land Use and Natural Resources)
- Thomas Stull (Brewing)
- Mary Tarro (Center for Human Services)
- Adrienne Trouw (Osher Lifelong Learning Institute)

Careers in Data Are Trending Up!

Data Analytics Boot Camp Set to Launch in February

The ability to translate data into actionable insights is a highly sought-after skill set in today’s data-rich economy. In fact, data scientist was named the “best job in America” according to Glassdoor’s 2018 rankings.

Launching February 19, the UC Davis Data Analytics Boot Camp is a part-time, 24-week program that teaches the knowledge and skills needed to conduct robust data analysis, model and forecast trends, and communicate findings effectively with visualizations.

With convenient weekend and evening sessions in mid-town Sacramento, the program is designed for working professionals or full-time students. The rigorous, fast-paced curriculum focuses on the practical technical skills needed to solve data problems. Throughout the program, students gain proficiency in high-value technologies, including Excel, Python, JavaScript, SQL databases, Tableau and more. Plus, students leave with an impressive professional portfolio and the confidence to succeed in a variety of data-centric careers.

What You’ll Learn

For anyone who’s new to the field of data analytics, knowing where to start can be a daunting task. That’s why our curriculum is designed to provide you with a deep foundation in the core technical skills needed to succeed in the field. Throughout the program, you can expect to learn new skills and be challenged in completing difficult real-world problems to demonstrate your new abilities.

Course Topics

- Advanced Excel
- Fundamental statistics
- Python programming
- Databases
- Front-end web visualization
- Business intelligence software
- Advanced topics such as big data analytics and machine learning

Program and Course Structure

Over 24 weeks, you’ll attend informative lectures, participate in a variety of individual and team exercises, and work independently in the classroom and at home. Homework assignments provide an opportunity to apply what you’ve learned and build on it. Get one-on-one assistance from instructors with in-person and virtual office hours, as well as a dedicated Slack channel for communicating with instructors, support staff and fellow students.

To learn more about the program see page 12 or visit bootcamp.ucdavis.edu.
William Lance Rodgers is a senior analyst for the Air Force Medical Service at the Defense Health Headquarters. He has spent close to a decade working with data, including nearly three years of experience in healthcare analytics. Being able to creatively solve problems and provide better information is what he enjoys most about his work.

After discovering that several analysts from the Air Force were taking the Healthcare Analytics Certificate Program at UC Davis Continuing and Professional Education, he decided it would be beneficial to him as well.

“My objective in taking the program was to improve my ability to work with large data sources, transforming data into information to help Air Force Medical Leadership make more informed decisions.”

Rodgers said the greatest benefit of the program was learning basic SQL programming, which also turned out to be the most challenging aspect, since he basically had to learn it from scratch. Familiarity with SAS programming and general knowledge of data usage in a healthcare environment were also valuable takeaways for him.

The online format made the program a viable option for Rodgers, who lives and works in Virginia. “As one of the older students in this program, this was my first online classroom experience,” he said. Despite underestimating the time commitment, he enjoyed the coursework and gained valuable information.

After completing the program, Rodgers has a better understanding of the available tools for analyzing healthcare data and has his sights set on securing a new position where he can maximize what he has learned. “Overall, the program presents multiple innovative ideas used to improve quality or cut costs, which can spur new ideas in the future.”

One thing that struck him was the general theme of the program, which was echoed by each of the instructors. “Healthcare analytics is a growing field, and the smarter we are in using the information, the better we can help control costs and improve the quality of health care,” he said.

In fact, one of his goals is to continue finding ways to help control costs and improve the quality of health care in the United States.

To learn more about our Healthcare Analytics courses and certificate program, please visit: cpe.ucdavis.edu/healthanalytics.

Winter Health Sciences courses are listed on page 9.
Instructor Spotlight: Kaan Kurtural

As an associate Cooperative Extension specialist in viticulture with the UC Davis Department of Viticulture and Enology, Kaan Kurtural is well versed in helping grape growers solve real-world production issues. “It is very satisfying to see the results of hard work,” said Kurtural, who grew up on a raisin ranch and whose research focuses on understanding whole grapevine physiology in order to improve agricultural practices and adapt to ecological stresses. Kurtural is the instructor of Establishing and Managing a Small Vineyard.

Kurtural describes his teaching style as participatory, where there is an expectation that students will actively engage in class discussions. He also wants students to come away from the class with the ability to manage their small vineyard without outside consultation. “This class is important because there are so many myths surrounding wine grape production,” Kurtural said. “I hope the class will lift the doubts and provide a good skill set for students to manage their small vineyards.”

Interested in taking a course with Kaan Kurtural? His new course, Establishing and Managing a Small Vineyard, begins on March 23, 2019. For more information see page 12 or visit cpe.ucdavis.edu/winemaking.

Instructor Spotlight: Terry Rivasplata

When asked to describe one of his most memorable teaching moments, Terry Rivasplata, an instructor for UC Davis Continuing and Professional Education’s Land Use and Natural Resources Program, recalled his early days of teaching. “I would get nervous before each class,” he admitted. “And there were a couple of times where a student would ask me a question I didn’t quite know the answer to, and I would break into a full body sweat.” Rivasplata smiled, “I was trying to remain calm, think quickly on my feet and, meanwhile, my entire body is sweating like that,” he said, snapping his fingers.

Having now taught courses on the California Environmental Quality Act (CEQA) and other subjects for over 20 years, Rivasplata doesn’t get too nervous before his classes anymore, but he still brings the same passion and enthusiasm for the subject matter that drew him to teaching in the first place.

“I enjoy teaching for two reasons,” he said. “One is the interaction with the students, and the other is just being able to keep up to date with what’s going on with CEQA.”

With over 40 years of professional experience in the environmental planning industry, it would be easy to assume that Rivasplata, who is a technical director at ICF International, could rest comfortably in the knowledge and experience he’s accumulated. But he knows that keeping himself current in the CEQA discipline is important both inside and outside the classroom.

“I work with a number of clients who demand a high level of expertise in CEQA, so I pay attention to litigation and what’s going on in the legislature,” Rivasplata said. “So, in my courses, I’ll talk about various court cases to give people an idea of how CEQA is being interpreted. Because if you just go by what the guidelines have to say, you’re not necessarily keeping up to date.”

Despite his highly technical understanding of the subject matter, Terry’s favorite course to teach is still the introductory class, CEQA: A Step-by-Step Approach. “It’s fun because most of the students are beginners who don’t know anything about it,” he said. “So they have lots of good questions.”

And when it comes to choosing an institution to learn about the complexities of CEQA and other planning-related topics, Rivasplata is decisive. “I think UC Davis has the best CEQA courses available in California, because they’re comprehensive, detailed and are taught by true professionals who keep up to date. Of course, I would say that since I help teach them,” he added with a laugh.

Terry Rivasplata is one of this year’s recipients of UC Davis Continuing and Professional Education’s Outstanding Service Award for his many years of dedicated and excellent service to the Land Use and Natural Resources Program (see page 2).

CEQA: A Step-by-Step Approach begins Feb. 1. For more info, visit cpe.ucdavis.edu/planning.
### AUTISM SPECTRUM DISORDER

As the first university-based autism program for those who work with children on the autism spectrum in California, and the only program affiliated with the prestigious UC Davis MIND Institute, we pride ourselves on providing you with the highest quality, research-based education available in Autism Spectrum Disorder.

ENROLLMENT INFORMATION

How to enroll
You can enroll online, in person, by mail, phone or fax. Payment is due at the time of enrollment. Visit our website for the most complete and up-to-date information. cpe.ucdavis.edu

If your plans change
If you are not able to attend a course you have enrolled in, you may be able to send a substitute, transfer to another course or withdraw. Some courses have special refund deadlines—review the Student Services section of the website or call us.

Special discounts
Your course may have a discount. To find out, check the course information online or call us.

Accessing your record online
Current/past students
At cpe.ucdavis.edu use the MY ACCOUNT button to log in to your account. Do not create a new account if you have previously enrolled in UC Davis Continuing and Professional Education courses. Use the FORGOT LOGIN or FORGOTTEN PASSWORD options to recover your login credentials. Give us a call if you are not successful in logging in to an existing record.

New students
At cpe.ucdavis.edu, create an account during the enrollment process or click on MY ACCOUNT and create a new account.

View your record
Once logged in you can view your upcoming courses, see completed courses, print a receipt for past payments and order a transcript.

Financing your education
Check options online for G.I. Bill, job training funds, tax credit reporting or student loans.

Student Services
For information on student conduct, holiday hours and much more, visit the Student Services section online. Contact us as soon as possible regarding services for students with disabilities. cpe.ucdavis.edu/student-services
