Winter Occupational Health and Safety courses now available.

SACRAMENTO’S PARTNER IN BUILDING A SMARTER AND SAFER WORKFORCE

CPE.UCDAVIS.EDU/HEALTH
Learn from the best in the industry! UC Davis Continuing and Professional Education offers the Sacramento region premier training in occupational health and safety. Through individual courses, or our certificate program, learn new skills to create and maintain a safer work environment for you and your coworkers. We can’t wait to see you in class!

Since you were new to the field, what was one of the biggest challenges you faced as you went through the program?

The biggest challenge was just making the decision to develop myself. I had to stand back and say, “I need to be better. How can I do that?” But once I started going to the classes, I found that UC Davis really created an environment that allowed students to bond and work together.

What was one of the most valuable things you got out of the program?

I’d have to say confidence. As a person who was given this responsibility without previous experience in the HSE field, I had opinions about how our site should run safely, but I didn’t have the background to know if these ideas were valid or not. The UC Davis Continuing and Professional Education instructors and the bond I formed with my classmates created an environment where I felt comfortable sharing my ideas and receiving feedback.

Would you recommend the program to others?

Yes, in a heartbeat. I found that the courses were really well paced, which allowed me to not only digest the information, but take what I learned in class and implement it at my job.

STUDENT SPOTLIGHT
Juan Viña

Like many employees today, Juan Viña was accustomed to taking on extra responsibilities at work. But when his supervisor asked him to assume the role of safety manager for his job site, he felt he needed help getting up to speed on his new position. So he enrolled in UC Davis Continuing and Professional Education’s Workplace Health and Safety Manager Certificate Program.

Why did you decide to pursue an education in health and safety?

My site director asked me to take on more responsibility, managing health, safety and environment (HSE) tasks at our site. But having no background in health and safety, I felt a little lost. So, our company’s HSE director suggested I take some classes through UC Davis, and things just went from there.

Introduction to Industrial Hygiene
This overview provides an introduction to the science of industrial hygiene, including the process of recognition, evaluation and control of occupational health hazards. Learn methods to anticipate and recognize such hazards, including basic principles of toxicology.
March 20-21 - $595

Industrial Safety Hazard Control
Expand your understanding of industrial safety hazard control by learning to identify and assess hazards in the workplace. Learn to recognize priority hazards as well as strategies for removing them. Discover how to use regulations as tools to identify and control hazards. Examine case studies and learn from the field, then brainstorm potential solutions to real-life problems.
Jan. 30-Feb. 1 - $685

Incident Investigation Techniques
Designed with both the novice and seasoned professional in mind, this course will give you the practical skills and tools needed to conduct effective incident investigations.
March 7-8 - $595

Safety Manager Program
Workplace Health and Safety Manager Program
Complete the program in three years or less and we’ll cover the cost of your last course (up to $675) and waive the $125 registration fee. Learn more: cpe.ucdavis.edu/health

3-year Certificate Agreement

Free Online Information Session
Join us for this free, online information session to hear about the courses and programs in our Occupational Health and Safety portfolio. Meet our instructors and staff and learn what our training can offer you.
March 20
